

*Two key actions:*

**HB 372: Pastor, Church & School Protection Act:**

Since the 2015 *Obergefell* same-sex marriage decision, activists and organizations have attempted to force others to participate in religious wedding ceremonies in violation of their consciences.

This bill would initiate a “Live and Let Live” philosophy so that same-sex couples can do what the U.S. Supreme Court has authorized . . . but it would also allow pastors, churches and religious schools to do what their God requires regarding matters of marriage and sexuality. State government would be saying that it will not discriminate – it would not attempt in any way to force a pastor, church or religious school to violate their deeply-held religious beliefs about marriage.

**HB 326: Students’ Right to Privacy Act:**

One of the clearest principles in the U.S. Constitution is a citizen’s right to privacy – government may not intrude or set a standard allowing others to intrude on the constitutional right to privacy. Because of this standard, *ALL* students have this right to privacy.

It’s particularly important for students because they *have* to be in school – *BY LAW*. As minors, they have no choice. So it is incumbent upon school leadership to do all it can to protect the privacy of *ALL* students in all school activities. **[Note:** This bill prohibits mixing students of the opposite sex when they are in various states of undress.]
